

FC Estimate Builder — Tabs 1–28 Review Summary (2026-07-22)

Every tab of the estimate-builder review doc, processed against the manager's inline responses. All work is on the fc-estimate **dev** branch, **additive** (no verified-number change — sanity 24/0 + 12/0 on every one). Nothing on **main** .

Legend: ● new engine module built · ● validation/confirmation (engine already correct) · ● held for manager decision/call.

Tab	Title	Verdict	What we did	Key open item
1	PF	● (earlier)	Insurance final-bill PF cascade; package PF GIPSA 20% / Non-GIPSA 25%	—
2	NME	●	HIMS NME ingested (<code>fc_nme_source</code> , <code>nme_profile</code>); advisory <code>estimate.expected_nme</code> (P50 + probability)	Phase-2 needs open- bill lines (C1); Intl outlier (A4)
3	Emergency	●	<code>estimate.emergency</code> overlay — ER- physician/assessment/bed, explicit- input-only, OT-E <code>ACTIVE_POLICY</code>	ER-physician ₹1,000 (A3); holiday cal / OT data (C2)
4	Positive cases	●	<code>estimate.positive_case</code> — HBsAg/HCV/HIV/isolation + OT surcharge 50/100%, policy-first	ICU-iso code, MSC2816, RNS0116 (C3)
5	DNB	●	Four-value billing-disposition metadata on settlement rows; <code>fc_hidden</code>	GIPSA instruments amount-move (A1); ₹1-share needs open- bill (C1/C8)
6	New Born	●	<code>estimate.newborn</code> — 4 pathways (healthy/well- baby/phototherapy/NICU), explicit- select	Cradle code (C4)
7	New Born mother- linked	●	KB reference only (billing concern, not FC per manager)	—
8	Pkg Incl/Excl	●	Cash reconciles-to-₹0 (98.6%); coverage engine already \$1; N2 skipped	Clarifications B1
9	Cross Consultation	●	<code>estimate.cross_consultations</code> — placeholder-dept by TR code, one- visit/day	Governed consult tariff- code mapping
10	Outside Pkg LOS	●	<code>packageOffer.outside_package_los</code> — excess-day model, package PF never recomputed	Ward/ICU pkg breakdown; pharmacy (C1)

Tab	Title	Verdict	What we did	Key open item
11	Medical Management	●	<code>estimate.medical_management</code> — family×setting, policy-first + semi-manual fallback	"28-admission template" (B2); family list
12	Daycare	●	<code>estimate.daycare</code> — 12h-threshold classifier fix (strict/extended/cross-midnight/converted)	Non-strict cases (B3)
13	Chemo	●	<code>estimate.chemo</code> — conservative shell; validated 1,624 chemo FC estimates exist	Drug master / price audit / prior-cycle (C7) held
14	Billing Training Guide	●	Confirms our OT-ladder/PF; final-insurance PF block IGNORED per manager	—
15	Labour Room	●	<code>estimate.labour_room</code> — <4h bed-only / ≥4h ROM0121 ₹9,900 or ROM5166 ₹15,000	Slot→code mapping (C5)
16	Tax	●	<code>estimate.tax</code> — 5% GST on non-ICU room rent >₹5,000/day, separate line	GST in headline? (A2); attendant/HDU (C6)
17	Blood Bank	●	<code>estimate.blood_bank</code> — minimal transfusion add-on, no unit-states	99.6% double-charge (C9, manager validating)
18	Equipment & Manual Add-ons	●	<code>estimate.manual_addons</code> — governed catalogue, four-column financial, mutex/location	Catalogue masters (C10)
19	Tariff Dataset Fallback	●	Engine already safe (cohort-history, PLACEHOLDER guard, TR1 cash-only); deliverable for hospital	TR1 fallback / service-primary (B7-B9); missing codes (C11)
20	Pharmacy Dataset	●	<code>estimate.pharmacy_selections</code> — source-mapped rate (sale→MRP→P50→user), UOM, replace-baseline	Curated selectable-item view

Tab	Title	Verdict	What we did	Key open item
21	Non-package handling	●/●	Contamination REPRODUCED (RT0006 across 34 depts); engine partly insulated	N8 rebuild held for eval (C12)
22	Package handling	●	N7 under-pricing does NOT affect us (package_master full amounts); fixes are project-3 artifacts	—
23	Handling variants	●	Engine keeps uni/bi separate, robotic payer-specific; lap-specific packages confirmed	—
24	Flow / Doctor-input / AI	●/●	Architecture already ours (code-first, robotic user-select, AI-refusal); effective-period answered	>90% add-on preselect-confirm, N9 layer, doctor contract (D2)
25	Pharmacy classification	●	Engine uses <code>fc_estimate_bucket</code> (corrected, 3,252 implants), NOT the defective flag	N10 data corrections
26	Non-pharmacy grouping	●	Engine reads <code>service_item_mapping</code> (detailed), NOT the incomplete clean view	N11 regroupings (data)
27	Stage-2 estimate logic	●/●	ARCHITECTURE VALIDATED (Gross-P50 + bucket allocation); pharmacy P25-P75 agreed	">₹1000-drop" surface-confirm held (D2/B10)
28	Treatment review	●	Engine enforces specific-over-broad (exact-first); package-price-from-code confirmed	N13 taxonomy (data)

Cross-cutting

- **Biggest unlock — open-bill service + pharmacy lines (C1):** moves NME Phase-2, the full positive-case cohort, the DNB ₹1-share, and outside-LOS pharmacy from policy-first to certified.
- **Manager review doc** (`manager-review-tabs1-28.md`): A1–A4 number-changing, B1–B11 interpretations, C1–C13 hospital/Finance data, D2 scoped-for-call.
- **Data deliverable:** `missing-tariff-codes-per-TR.md` .
- **Remaining build follow-up:** frontend rendering of all new `estimate.*` fields.
