

Inclusion / Exclusion Text — AI Rewrite: Approval Samples

Purpose: Before we run an AI rewrite over ALL package inclusion/exclusion texts, this doc shows the own reference rewrite (Sample 0) plus 5 real before/after samples (pulled live from the fc-estimate engine, tariff TR1) redone in that exact style, for sign-off. **Rule set the bulk run will follow (extracted from the reference rewrite, Sample 0):** content must stay faithful — every substantive item and rupee figure preserved, nothing added; wording is a flat, compact bullet list of "Label: value" lines (no bold-heavy nesting, no sub-bullet per service item); IP and OT pharmacy are combined into one "Pharmacy:" line; caps are phrased "Up to ₹X"; room-wise figures use compact notation "₹7,260 (Twin) / ₹7,920 (Single)" and collapse to a single number when identical across room types; the comma-run of OT/ward service items is grouped into thematic lines (OT & Procedure Charges, Routine Consumables & Nursing, Catheter Care, Pre-operative Care, Medical Records, Consultations, Monitoring); a procedure row becomes its own labeled line; trivial "x1" counts are omitted while meaningful quantities (days, hours, "1 each", session counts) are kept; internal codes like OP-10 are omitted from the patient-facing text (always preserved in the original/audit column); OCR junk, stray pipes and 0 – 0, fragments are cleaned up. **Grouping:** each rewrite is structured as "What the package covers" and "What is NOT covered (billed extra)", each rendered as a flat bullet list. **Storage:** two columns — the clean patient-facing text shown on the estimate, plus the original text preserved unchanged for audit (internal codes such as OP-10 live only in the original/audit column). **Data flags:** where the stored text contains duplicated/conflicting blocks (two tariff versions pasted together), the rewrite keeps both and flags them for data-team reconciliation — the AI never silently picks one. **Action requested:** please approve these samples as-is, or annotate directly on this doc with corrections to the tone/structure/rules before we start the bulk run.

DATA FLAG: the stored inclusions contain two near-identical blocks with conflicting figures — Investigations ₹7,260/₹7,920 (Twin/Single) vs ₹8,000/₹8,000, and specialist consultations 1 each vs 2 each. Both versions are preserved below; needs reconciliation before publishing.

PROPOSED PATIENT-FACING REWRITE

What the package covers

- Hospital Stay: 2 days Ward + 1 day ICU
- Pharmacy: IP medicines up to ₹15,000 + OT medicines up to ₹35,000
- Implants: Up to ₹75,000
- Investigations: ₹7,260 (Twin) / ₹7,920 (Single) *(a second stored version says ₹8,000 for both room types — under reconciliation)*
- Surgeon Charges: ₹50,000
- Anaesthesia Charges: ₹12,500
- Assistant Surgeon & Anaesthesia: As per hospital policy
- OT & Procedure Charges: 3 OT hours, major instrument charges, OT disinfection, CSSD (GA), post-surgery recovery
- Routine Consumables & Nursing: Ward consumables, dressing (minor x2), syringe pump (3 days), monitor (2 days), warmer
- Catheter Care: Foley's catheter insertion & removal
- Pre-operative Care: Pre-anaesthetist check
- Medical Records
- Consultations (1 each): Physician, Endocrinology, Nephrology, Cardiology, Pulmonology *(a second stored version lists Physician, Nephrology, Cardiology and Pulmonology at 2*

each — under reconciliation)

What is NOT covered (billed extra)

- Cross-specialty consultations beyond those listed
- Virology disposable kit
- Ventilator charges
- Attender food & beverages and additional patient orders
- Any medications or investigations not related to the procedure
- Diabetic management
- Any stay, services, investigations, or consumables beyond the package duration (charged as per actuals)

DATA FLAG: the stored text contains two different tariff versions merged together (e.g. pharmacy limit ₹25,000 vs ₹20,000; surgeon fee General Ward ₹19,670 vs ₹13,710; the older version also lists a paediatrician fee of ₹5,000). Both versions are preserved below; needs reconciliation before publishing.

PROPOSED PATIENT-FACING REWRITE

What the package covers — Version A (current)

- Hospital Stay: 3 days Ward (no ICU)
- Pharmacy: Up to ₹25,000
- Investigations: None included
- Surgeon Charges: ₹19,670 (General Ward) / ₹21,580 (Twin) / ₹28,640 (Single) / ₹37,300 (Deluxe) / ₹41,900 (Suite)
- Anaesthetist Charges: ₹4,920 (General Ward) / ₹5,400 (Twin) / ₹7,160 (Single) / ₹9,320 (Deluxe) / ₹10,470 (Suite)
- Assistant Surgeon & Anaesthesia: As per hospital policy
- Duty Medical Officer (DMO): 3 visits

- OT & Procedure Charges: 1.5 OT hours, medium instrument charges, OT disinfection, CSSD (GA), post-surgery recovery
- Routine Consumables & Nursing: Ward consumables, oxygen (2 hours)
- Monitoring: CTG monitor (half day)
- Catheter Care: Foley's catheter insertion & removal
- Pre-operative Care: Pre-anaesthetist check
- Medical Records
- Consultations: Diet consultation

What the package covers — Version B (older stored block, retained for audit)

- Hospital Stay: 3 Room days (no ICCU)
- Pharmacy: Up to ₹20,000
- Paediatrician Charges: ₹5,000
- Surgeon Charges: ₹13,710 (General Ward) / ₹15,140 (Twin) / ₹16,680 (Single) / ₹22,500 (Deluxe) / ₹30,000 (Suite)
- Anaesthesia Charges: ₹3,430 (General Ward) / ₹3,790 (Twin) / ₹4,170 (Single) / ₹5,630 (Deluxe) / ₹7,500 (Suite)
- Assistant Surgeon & Anaesthesia: As per hospital policy
- OT & Procedure Charges: 1.5 OT hours, major instrument charges, OT disinfection, CSSD (GA), post-surgery recovery
- Routine Consumables & Nursing: Ward consumables, syringe pump (1 day), infusion pump, monitor (1 day), warmer, oxygen (2 hours)
- Monitoring: CTG monitor (half day)
- Catheter Care: Foley's catheter insertion
- Medical Records
- Consultations: Diet consultation

What is NOT covered (billed extra) (combined from both stored lists; duplicates merged)

- Cross-specialty consultations
 - HIV, HBsAg & HCV disposable kit
 - Any medications or investigations not related to the procedure
 - Diabetic management
 - Special equipment charges
 - Room rent and doctors' fees beyond 3 days of stay, for any reason
 - Unusually costly drugs & disposables (e.g. Anti-D immunoglobulin, baby vaccines)
 - Tubectomy charges, twin baby delivery, muhurtham charges
 - High-risk charges (charged extra)
 - Any stay, services, investigations, or consumables beyond the package duration (charged as per actuals)
-

- Any medications or investigations not related to the procedure
- Diabetic management
- Special equipment charges
- Any stay, services, investigations, or consumables beyond the package duration (charged as per actuals)

Notes on cleanup decisions applied in these samples (the bulk run will follow the same)

1. **Style follows the canonical sample (Sample 0).** Flat "Label: value" bullet lists; IP + OT pharmacy combined into one line; caps phrased "Up to ₹X"; room-wise figures in compact "₹X (Twin) / ₹Y (Single)" notation, collapsed to a single number when identical across room types; the comma-run of OT/ward service items grouped into thematic lines (OT & Procedure Charges, Routine Consumables & Nursing, Catheter Care, Pre-operative Care, Medical Records, Consultations, Monitoring); procedure rows get their own labeled line.
2. **Every substantive item and rupee figure preserved, nothing added.** The only removed tokens are pure OCR junk (the stray 0 – 0, entries, trailing commas/pipes) and trivial "x1" counts; meaningful quantities (days, hours, "1 each", session counts) are kept.
3. **Internal codes are omitted from the patient-facing text.** Per the sample, cryptic internal codes like 0P-10 are dropped from the clean text and always preserved in the original/audit column. If the billing team supplies a glossary, the bulk run can expand these into patient-friendly terms instead.
4. **Merged/duplicated blocks are flagged, not resolved.** Samples 1 and 4 show the flag format. The AI keeps both versions and marks the record for data-team reconciliation.

5. **Two-column storage:** `inclusions_text_clean` / `exclusions_text_clean` shown to patients on the estimate; original `inclusions_text` / `exclusions_text` untouched for audit.

Manager: please approve, or annotate the specific samples/rules you want changed.
