

Questions — Estimate Builder

1. Please share the **KIMS Insurance Packages Excel**.
2. Please share the **MOU rate sheets** for Star Health, HDFC Ergo and Bajaj (their tariffs are missing standalone service rates) — whenever available.
3. For those missing rates we now **fall back to TR1 (cash) rates**, visibly marked on the estimate. **₹1 token rates are left untouched**. Confirm — or should ₹1 tokens also be replaced with TR1?
4. Robotic under GIPSA: instead of auto-switching, we show a **one-click suggestion** — "GIPSA prices this as TKR + robotic add-on — switch?". Confirm?
5. **TPA** is a free-text field for now. OK — or do you have a TPA master list you want as a dropdown?
6. LOS × ward-charge bug: **which treatment + insurer + room** did you see "₹1200/day × 3 not multiplying" on? (screenshot ideal)
7. Detailed-form carry-over issue: **one example** of a field that came over wrong?
8. Inclusion/exclusion rewrite **samples** are in `incl-excl-rewrite-samples.md` — please approve or suggest changes before we run it across all packages.
